SKB CABINETS FOR DOCUMENTS AND FILES

Cabinets for documents and files are a perfect and a practical combination of the filing cabinet for files with the cabinet for other documents.

Drawers are installed on double extension ball bearing slides, protected from falling out.

Cabinets have a special mechanism allowing for opening of only one of the drawers at a time which protects the cabinet against tipping.

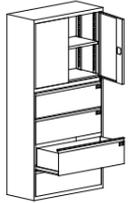

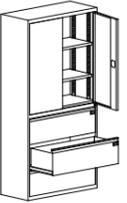

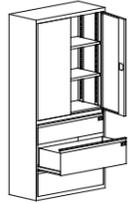

Drawers are equipped with a central locking mechanism. Maximum load capacity of each drawer is approx. 40 kg. The cabinet is made of powder coated steel sheet and the bottom part of the cabinet is made of zinc galvanized steel sheet.

Door handle is equipped with lock securing cabinet in 2 points.

In the part for documents there are adjustable shelves every 25 mm.

SAM W REINFORCED CABINETS FOR DOCUMENTS FILING CABINETS WITH INCREASED FIRE RESISTANCE

SAM W REINFORCED CABINETS FOR DOCUMENTS

This cabinet is filled with fireproof mineral wool – ideal for keeping important documents. The cabinet has filling protecting against fire. Doors are bolted – secured with certified lock in class A.

For Sam W lockers we offer - as an option:

- compartment,
- extendable shelves,
- frame drawers.

There is also a possibility of fixing the cabinet to the floor and installing a combination lock.

FILING CABINETS WITH INCREASED FIRE RESISTANCE

Double sheet steel cabinet. The space between cabinet sheaths is filled with a fireproof material. Fire resistant filling significantly extends the time of fire access to the documents. Fireproof seal protects the cabinet contents against quick warming. There is the possibility of storing A4, Folio, Grand Folio formats.

SCD CABINETS FOR CD'S

CD's can be kept in three rows – 22 pieces in each row. CD's supporters inside the drawer are movable. Each drawer can be labelled thanks to the self-adhesive card-holders placed on the front of the drawer. Drawer's full extension enables easy access to all CD's. Drawers are equipped with a central locking mechanism. Drawers are installed on double extension telescopic ball bearing slides, protected against falling out. Top plate as standard. Selection of top plates on p. 79.

OFFICE FURNITURE

DESKS CONNECTORS

Available options of desks equipment:

- perforated front cover,
- desks connectors,
- accessories: cable connector, cable duct.

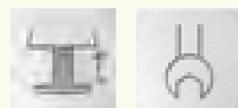

Desk-connector configuration:

- half-round connector,
- quarter round connector.

For the greater user comfort there is a possibility of ordering front covers. These covers allow to hide from view things that are under the desk and additionally, they separate legs of interlocutors.

Front covers are made of the powder coated metal sheet. The holes in the cover are cut with laser, which aesthetically distinguishes them from other metal covers.

Thanks to desk connectors it is possible to adjust desk arrangement depending on space and shape of a room.

SZP MOBILE PEDESTALS

Mobile pedestals of proved quality allow for practical equipping of office space. Thanks to the application of the highest quality steel SZP mobile pedestals are extremely long-lasting and stable. Full extension ball bearings slides provide smooth and simple extension of drawers.

SZP mobile pedestals are equipped with central locking system opening and closing all the drawers at the same time.

Available mobile pedestals:

- lower (520 mm high), able to be used as a seat,
- higher (663 mm high) allow to use the space under the desk to the maximum.

The top of SZP mobile pedestals is made of the 18 mm thick melamine covered plate, or of 16 mm MDF board. Choosing either metal or melamine covered plate fronts makes it possible to adjust them to each interior.

We offer two types of containers: with 2 and 3 drawers. Pedestals equipped with 4 swivel wheels, including 2 wheels with brakes. They are covered with melamine top or MDF (optional).

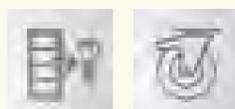

Drawers are installed on full extension ball bearing slides:

- 45 kg load capacity. Drawers' size: 330 x 420 mm.

Pedestals are locked with a central lock placed on the right side of pedestal.

Mobile pedestal accessories:

- plastic pencil box as an insert,
- fronts of drawers made of melamine covered plate.

OFFICE FURNITURE

TABLE TOPS

Table tops have a wide range of applications: in offices, studies and objects on open-space. They are characterized by a modern design, with the functionality and the ergonomics of the service. Legs of the table are equipped with adjustable feet. The construction enables to hide cables in cable trays.

COLOURS OF TOPS:

- Grey,
- Cream,
- White,
- Black,
- Beech (at an extra cost).

Black veneer of tops.

CABLE DUCT:

A horizontal structural beam under the top strengthens the stiffness of the construction and simultaneously it serves as a horizontal channel allowing for an aesthetic hiding of wires. This ensures that all your cables are in their place and do not make a mess under the desk and worksite looks exceptionally aesthetically pleasing.

Cabinets can be placed on benches, and then fixed with screws.

The seat consists of three wooden slats coated with clear varnish or plastic slats, especially recommended for use in wet environments.

We offer 2 price versions:

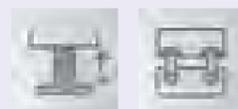

- standard (frame and legs are made of closed profiles),
- economic (frame is made of bent steel sheet, legs of closed profiles).

In our offer, we have very practical, extendable benches which help to save space. These benches are ideal where it is essential to organize a space effectively. The bench has an extendable seat, which fits under the wardrobe.

All bases increase the height of cabinets by 390mm.

SOCIAL FURNITURE

SCHOOL LOCKERS

School lockers are made of prime quality steel sheet. For additional protection against corrosion, the bottom of the cabinet is made of zinc coated sheet. We use powder paintings from leading global manufacturers.

Wide range of standard colours – 16 RAL colours.

As a standard we offer a cylindrical lock blocking in 1 or 3 points (in selected products).

There is also a possibility to order other locks according to individual needs. Most of our lockers can be placed on the benches or with legs.

Lockers of our production have declarations and certificates of compliance with Polish and European norms, as well as hygienic certificate issued by PZH (National Institute of Public Health).

1450 mm high wardrobe locker is destined to younger pupils. In the doors of the lockers there are ventilation holes allowing for free exchange of the air in the locker.

Lockers with compartments are made in different price versions – depending on the thickness and type of steel sheet of which they are made (including galvanized, acid-proof steel).

We also offer lockers with compartments with additional equipment as follows:

- bar with hooks,
- book shelf, notebook, handheld things.

ADVANTAGES OF LOCKERS

rich equipment as a standard

SCHOOL LOCKERS

SUM S CABINETS FOR PRESCHOOLERS

In our offer we also have Sum S lockers 1350mm high for kindergarten children. Even the youngest children will be able to hang their clothes and reach the shelves without any effort.

Cloakroom for children equipped with wardrobe lockers enhances children's independence. Children who have their own, individual lockers, more willingly and actively prepare to their classes.

The standard locker is lockable with a cylinder lock blocking in one point.

Other options of the lock:

- locking in 3 points,
- handle with magnet closure.

SUM S LOCKER FOR 6-YEAR-OLDS

Sum S locker is 1500 mm high, so younger children have more space comparing to Sus lockers with compartments, and they can hang their clothes and reach the shelves easily.

Locker is equipped with a bar with hooks, hook doors and shelves for storing books, notebooks and handheld things.

SOCIAL FURNITURE

LAPTOP/TABLET TROLLEYS

Trolley for laptops with function of battery charging is used to storage and easy transport of laptops. It is ideal for schools, colleges, libraries, conference halls, or anywhere where there is a need for secure storage and simultaneous laptops charging. Trolley WNL is particularly useful in a classroom, where students need to charge laptops and store them safely. Thanks to the mobile trolley WNL can be easily and safely moved with laptops from one class to another.

WNL trolley is used to store, secure and charge simultaneously from 10 to 30 laptops.

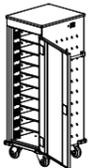

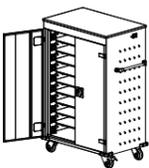

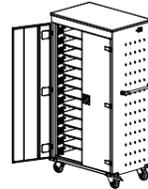

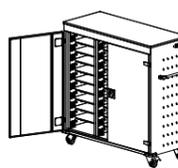

For the overload protection the sequencer is used, which enables to turn on the particular power strips after the specified time (~3 minutes) which results in a low maintenance of electrical load of the trolley during the charging process. A light-emitting diode is signalling the work of power strips of the laptop trolley.

The door of the trolley are protected against unauthorized access by a key lock with locking in two points. Trolley Laptop WNL was awarded the European Medal.

TROLLEY TO THE MEDAL

Depth (mm)	500		500		
Number of compartments	10	16	20	26	30

The trolley top is covered with melamine as a workspace. The frame has holes allowing for air circulation. Maximum laptop size: 90 x 340 x 470mm (17 inch). The trolley frame is made of metal sheet painted polyster-epoxy.

Trolley has a Certificate of Compliance to European Directive 2001/95 concerning product safety.

Work safety

A sequencer and 2 fuses against overloading protect against overload lines. Trolley has a Certificate of Compliance to European Directive 2001/95 concerning product safety.

Mobility

Easy moving thanks to swivel wheels diameter of 100mm covered in gum of non-marking surface (2 of them with brakes).

Ergonomics

Handles mounted on both sides and top make it easy to use.

Security

Doors of the trolley are secured with a key lock in blocking in 2 points. Trolley side edges secured with rubber corners.

SOCIAL FURNITURE

LOCKERS FOR LAPTOPS / MOBILE PHONES

LAPTOP LOCKER

Laptop lockers are designed to secure laptops with function of charging their batteries during storage. Inside the body a strip is mounted, which contains sockets for connecting chargers. Cabinet for laptops is also available in the version without electric installation.

AND MOBILE PHONES LOCKERS

Cabinets for storing mobile phones are used in the pass desks, agencies, institutions, libraries, reading rooms and other places where we cannot use mobile phones. These cabinets can also be used as key deposits.

SOCIAL FURNITURE

SOCIAL FURNITURE WITH MDF DOORS

The cabinet with MDF doors is the perfect combination of excellent technical parameters of the metal cabinet with aesthetics and ecology of the MDF board.

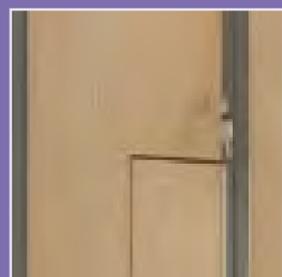

MDF is an ideal substitute of wood with no structural imperfections such as knots or cracks which are typical for wood. Unified both composition and density makes it an ideal material. The use of colourful or wood-based fronts with MDF gives the wardrobe locker the effect of lightness, comfort and a unique appearance.

The doors of high quality laminated MDF.

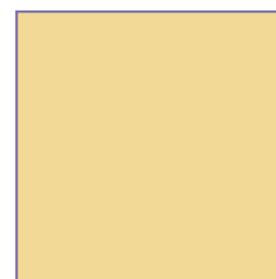

Used galvanized hinges belts.

SOCIAL FURNITURE

KBS LOCKERS FOR CLEANING

For easy, safe and pleasant work...

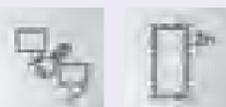

KBS type cabinet is a very practical type of metal furniture both for the distribution of safety products and to store dirty clothes.

Each compartment is closed with an independent key, and common frame allows to open all the lockers at the same time.

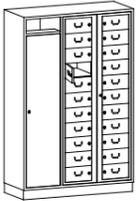

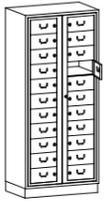

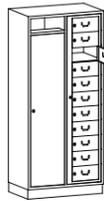

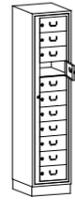

The person distributing safety materials has an access to all the compartments, and thanks to this he or she can control the stock and regularly restock them.

The main advantage of KBS cabinets is a significant reduction of industrial safety products, and thus reducing costs.

Modules of the cabinet for dirty clothes allow throwing dirty clothes through the opening slot easily.

MPO METAL RECYCLING BIN

Containers designed for internal use for various wastes, ex. plastic, paper, glass. The body made of 0.6-0.8mm thick steel sheet, powder coated. The slopping top prevents wastes from piling on the top of the container.

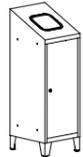

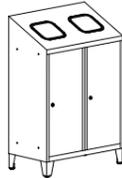

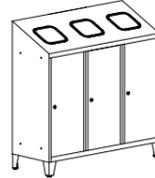

Self-closing lids prevent odours from emitting and closes the container in an aesthetic way. Containers allow gathering wastes in 120-litre disposal bag, or in internal, galvanized, metal containers of following dimensions: 700 x 295 x 357 mm (option at an extra cost).

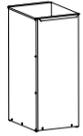

Access to the container is simple, thanks to frontal winged doors locking with a free-turning latch lock with a possibility of padlock locking.

Extendable frame for disposal bags placed on full-extension ball bearings facilitates access to disposal bags.

Disposal bag is placed on a frame by pressing it down with upper part of the frame mounted on hinges.

MEDICAL FURNITURE

DOCTOR'S OFFICE

Our medical cabinets allow for a complex arrangement of every room. The presented visualizations are just suggestions. The choice is yours.

EQUIPPING SUGGESTIONS

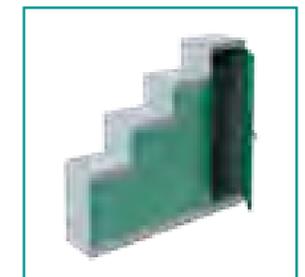

small, practical desks

a wide selection of filing cabinets

additional equipment

wide range of cabinets

MEDICAL FURNITURE

DOCTOR'S OFFICE

We suggest two kinds of desks designed for a doctor's office:

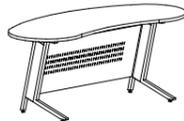

- small, highly functional STB desks with mobile pedestals,
- Zbm 304 desks with rounded top and with Szp mobile pedestal.

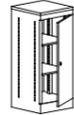

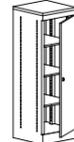

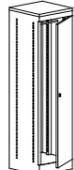

The 'Alicja' furniture set is highly functional as well. The set consists of Zbm desk and Zbm lockers (including one for clothes).

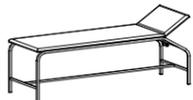

As an addition to medical furniture we offer an exam table, a stool, and a curtain – indispensable in a doctor's office.

WORKSHOP FURNITURE

SZW WORKSHOP LOCKERS WITH DRAWERS

ŠNN TOOL WALLS

It is essential to have the most necessary tools within reach. This can be ensured by our tool walls. Tool walls can be placed according to individual users requirement. The perforated walls make the tools easily accessible and keep the workstation orderly.

SZWN WORKSHOP TROLLEY

The workshop trolleys are equipped with:

- tabletops made from hardwood plywood,
- all drawers locked with central lock,
- drawers on roll bearings slides (maximum load capacity of 50 kg per drawer),
- doors locked with cylindrical lock,
- swivel wheels.

SZWG LOCKER

Workshop locker on swivel wheels (2 with brakes). The top part made of perforated steel sheet (back and side walls), the bottom part with a shelf and 2 drawers. Set of hooks - according to the client's needs (at an extra cost).

SZW WORKSHOP LOCKERS WITH DRAWERS

Szw lockers provide stable construction, central lock, anti-tilt system (preventing from opening more than one drawer at a time). Maximum load capacity per drawer: 75 kg. At the client's request the table top can be made of: rubber, plywood in metal frame or acid-proof steel sheet.

Drawer partitions are also available, allowing for dividing the drawer into 5 rows. Every row is equipped with 2 galvanized partitions.

WORKSHOP FURNITURE

RMM STORAGE RACKS

Universal storage racks are essential everywhere where there are different objects stored, such as tools, cartons etc.

In order to shorten the time-consuming assembly of storage racks we designed racks assembled without screws. They are simple and easy to assemble and disassemble. Durability, solidity and quality are unique qualities of these storage racks. Elements of storage racks are made of powder coated metal sheets.

It is also possible to order storage racks made of galvanized acid-resistant steel.

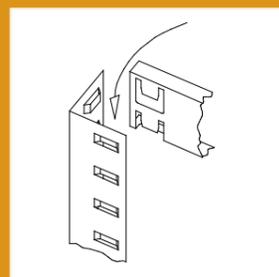

In rack assembled with screws shelves are adjustable every 60 mm, and every 30 mm in racks assembled without screws.

Storage racks for self-assembly.

WORKSHOP FURNITURE

CABINETS FOR INDUSTRIAL COMPUTER

Perfect solution for factories to store industrial computers.

SPNK

The wardrobe has a flat structure of minimum depth. The front screen is adapted to assembly 16:9 LCD screen and of maximum 22 inches diagonal.

The resistance class, supported with examinations IP-42, ensure protection of the cabinet against foreign objects of over 1 mm size, and protection against drops of water falling down on the casing at the angle of 15 degrees.

The unscrewed base of the cabinet enables screwing the cabinet directly to ground.

Rich equipment as standard: a fan, a power supply, a service wire, and a power strip with the antiinterference filter.

SMK

The upper glass part for LCD screen allows to use the equipment even if there is dust on the factory floor.

The bottom covered part serves for the safe-keeping of the computer and other devices.

Extendable shelf allows for using the keyboard easily and comfortably. The cabinet has legs with the possibility of levelling what allows to put it on each kind of floor, even the uneven one.

The cabinet is equipped with the inner electric fan that cools the working computer. In the bottom part of the cabinet there is a powering anti-interference slat. The back side has ventilation holes in it.

The adjustable shelf makes it possible to set its height depending on the kind of computer kept in the cabinet.

SmKa

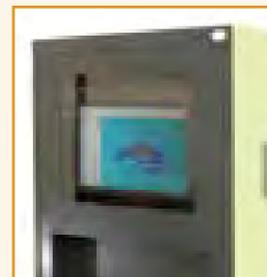

Computer protection

Protection against dust and water, accidental damage and unauthorized access – IP 42 resistance class.

Stability

The unscrewed base of the cabinet enables screwing the cabinet directly to ground.

Functionality

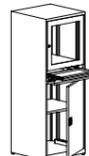

The 4:3 front screen is adapted to assembly 16:9 LCD screen and of maximum 22 inches diagonal.

Wide range of accessories

Standard equipment: 2 shelves on latches, 1 extendable shelf for a computer, a fan, a power strip with the anti-interference filter, Ethernet loop, power strip, a handle for LCD screen, doors with a lock with patent filler – 3 point locking, Place for a keyboard closed with a cylindrical lock – locking in 1 point.

WORKSHOP FURNITURE

INDUSTRIAL COMPUTER CABINET

SMK 3A

Cabinets are equipped with the drawer for a keyboard and extendable shelf in the bottom compartment. On the side walls the cabinet has a ventilation. In the back wall of the cabinet there are holes for the power supply. Glass screen made of the tempered glass. The cabinet equipped with levelling feet.

SMK 4A

Industrial computer cabinet – the glass part is adapted for the depth of the LCD screen. Extendable shelf allows for using the keyboard easily and comfortably. The back side has ventilation holes in it. The adjustable shelf makes it possible to set its height depending on the kind of computer kept in the cabinet.

SMK 2

Industrial computer cabinet made of 0.8 mm thick steel sheet. There is one door at the entire height. A shelf for the LCD screen is fixed, other shelves can be adjusted every 25 mm. The cabinet can store LCD screen of size up to 17 inches. The cabinet is equipped with a fixed shelf for a keyboard and a mouse (assembly at customer's place), a fan, a power strip with 4 sockets.

MOVABLE SHELVING SYSTEM

LITREG CRANK DRIVEN MOVABLE SHELVING RACKS

WE UNDERSTAND THE NEEDS

We understand your needs for the equipment of offices, archives and libraries, thus we have movable shelving racks in offer. It is an ideal solution for the archiving and storing, as it gives unlimited possibilities and allows to use archival area at maximum.

WE GUARANTEE THE FUNCTIONALITY

Wide range of the equipment possibilities ensure effective use of even the smallest space. Additional equipment: frame, extendable drawers, shelves and supports for documents ensure effective work.

WE ENSURE THE SATISFACTION

We will present our offer on your every single enquiry. We will design the plan of developing an archive, a warehouse or an office with bookshelves at no extra cost, proposing the most advantageous solutions. Together we will create the optimal solution for the efficient use of rooms.

MOVABLE SHELVING SYSTEM

LITREG CRANK DRIVEN MOVABLE SHELVING SYSTEM

We offer solutions which adapt to people's needs and guarantee functionality, dynamics, efficiency of use and friendly atmosphere.

There is a possibility of adjusting the height of shelving racks and width of shelves according to customer needs.

Extendable frame drawer – an easy access to files.

Extendable shelf – ensures comfort of use.

Book support - for comfortable use and organized files.

Crank mechanism with blockade - safe manual.

Crank mechanism with blockade with a lock - additional security.

Solid frame bearer guarantees stability and durability.

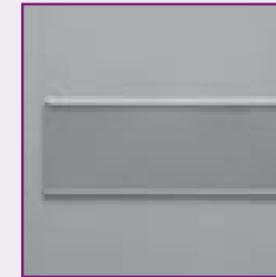

Solid crank mechanism - big transmission, easy to move.

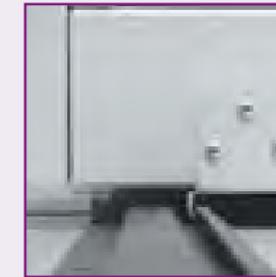

Adjustable shelves – guarantee flexibility of shelving racks.

Strengthening cross bar - ensures stability and stiffness of shelving rack's construction.

Frame with card holder - allows for proper organization of documents.

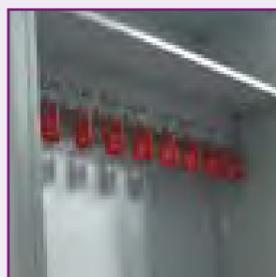

Embedded trackage.

Surface trackage.

Mesh panel system - for safe paintings storage.

Wardrobe rack - wide range of use.

TECHNICAL SPECIFICATION

400 running metres of shelving

ECONOMY OF SPACE

Standard shelving rack allows to store only 1040 file boxes.

By applying LITREG CRANK DRIVEN MOVABLE SHELVING SYSTEM it is possible to double the storage place.

Furnishing the same area with our movable shelving racks allows to store 2080 file boxes.

Because of individual technical conditions and customer's requirements, we provide you with a project together with the estimated cost only after receiving the information about available space and the requirements.

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING SYSTEM
WITH SOFT TOUCH
ELECTRIC DRIVE

MODERN SYSTEM

The movable shelving racks with SOFT TOUCH system is a truly innovative solution. Moving particular units no longer requires any physical effort. Tap gently in specific spot to access to required archives. This is a perfect solution for large and often used archives, when user is carrying documents and cannot use his hands, and especially for disabled people. Shelving rack moves smoothly, what protects files against changing their position during the action.

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING SYSTEM WITH SOFT TOUCH ELECTRIC DRIVE

The trackage is galvanized. The total height of the track is 12 mm. Trackage is anchored to the floor with expansion bolts. The outermost tracks have an anti-tilt system, protecting against overturning. Optimally selected number of rails ensures smooth and easy movement of units. There is also a possibility of installing a chain in the trackway.

SHELVING RACK'S FUNCTIONS

Movable shelving system provides the possibility of transmission by means of following elements: electric motor and cogwheels coupled with transmission shaft.

The control system has the following functions:

- opening,
- blocking,
- resetting,
- failure alarm,
- moving apart, airing,
- user protection, safety.

FRAME CHASSIS

The frame is made of powder coated steel profiles coloured in RAL 7035. The frame is equipped with shafts and cast iron wheels. The wheels have ball bearing to improve the quality of use. The frames are equipped with rubber distance buffers in order to prevent units from sliding off. Movable shelving system provide the possibility of transmission by means of following elements: electric motor, cogwheels coupled with transmission shaft.

LOAD-BEARING WALL

The load-bearing wall is made of powder coated steel sheet and perforated every 25 mm (either in intervals or continuously). Thus shelves can be adjusted at any desired height. For additional rigidity of units, a cross-wise strengthening is applied.

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING SYSTEM WITH SOFT TOUCH ELECTRIC DRIVE

Movable shelving system with SOFT TOUCH electric drive links features of archiving huge stores of documentation with the greatest customer service.

Shelves are made of powder coated steel sheet and are equipped with a stop, which prevents documents from moving. Shelf's loading capacity is 40 kg or 80 kg (as an option). The front wall from the side of control panel, is covered with a decorative panel.

SAFETY

The shelving is designed with a possibility of locking with special keys. The access to particular units might be restricted to employees who possess the key. The shelving also have in-built 'night positioning' option. All units slide in equal distance to each other so as to provide additional ventilation. Units are equipped with electric overload protection, that reacts to all obstacles while moving. Additionally, the shelving is equipped with a passive safety system. The system forces users to have a look at an opened alley, before it moves to another. All the functions guarantee safe use.

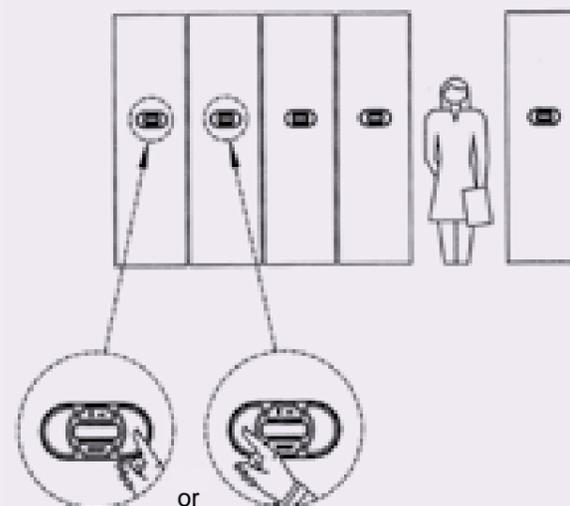

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING SYSTEM WITH SOFT TOUCH ELECTRIC DRIVE

Movable shelving system with modern electric propulsion. The control panel and the entire mechanism of the electric drive are fine-tuned in every detail, with the greatest safety consciousness and comfort of the user.

The movement of the system is held through the control panel placed on the front wall of each unit. There is a possibility of moving all units with one control unit. Control panel indicates the direction of movement and opening of a corridor. Opening and closing of a particular unit comes down just to press the button on the control panel. This panel is equipped with the system of signal diodes, informing about the system failure. Additional control program is detecting and signaling the place and the kind of a breakdown.

The units are moved through the control panel.

Cords are in cable channels put on the top of the unit- as shoulders between elements.

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING SYSTEM WITH SOFT TOUCH ELECTRIC DRIVE

There is a possibility of adjusting the height and the gauge of shelves and of selecting solutions to individual needs of users.

Lighting of the space between units. The illumination is controlled electronically and works only above the unit currently used by personnel. Lighting covers are placed on metal trusses, screwed to the top shelves (the covering). The illumination starts automatically when the alley is opening and switches off when it is closing, provided software allows user to set the time after which the light is switched off.

Mesh panel system for safe storage of images.

Pull-out frame drawers facilitating access to documents.
