OFFICE FURNITURE

SZK FILING CABINETS

Metal filing cabinets are aesthetic, functional, solid and most importantly, they allow to maintain perfect order in documents and files. Documents in various sizes may be stored in our cabinets - from standard sizes like A5 or B5 to A3 to other more unusual sizes.

- Drawers are installed on double extension ball bearing slides, protected from falling out.
- Cabinets are equipped with a special mechanism allowing to open only one drawer at a time, which prevents the cabinet from tipping over.
- Central locking mechanism of drawers.
- Maximum drawer load capacity is up to 50 kg.
- We offer self-adhesive cardholders corresponding to the number of drawers.
- Chock for levelling the cabinet included.
- Cabinets meet the requirements of storing documents imposed by GDPR.

OFFICE FURNITURE

FURNITURE SETS

We present a few suggestions which depict how our metal furniture can be put together. Such solutions guarantee perfect managing of space and maximising storage space.

Examples are as follows:

- filing cabinets with cabinets for documents with sliding doors as top cabinets,
- office cabinets with top cabinets - filing cabinets with wing and shutter doors + top filing cabinets.

■ Cabinets meet the requirements of storing documents imposed by GDPR.

IMPORTANT: Furniture sets require fixing to each other and securing against displacement.

Wardrobe cabinet (including bars for coat hangers).

DESK CONNECTORS

Available options of desks equipment:

- perforated front cover,
- desks connectors,
- accessories: vertical cable duct, cable duct.

Desk connectors configuration:

- half-round connector,
- quarter-round connector.

■ To improve user's convenience it is possible to order front covers. These covers allow to hide from view things that are under the desk and to separate legs of interlocutors.

■ Front covers are made of powder coated metal sheet.

■ Holes in the cover are laser cut, what aesthetically distinguishes them from other metal covers.

■ Thanks to desk connectors it is possible to adjust desk arrangement depending on space and shape of a room.

For the choice of colours see page 142.

SZP MOBILE PEDESTALS

Mobile pedestals of proved quality allow for practical furnishing of office space. Thanks to use of the highest quality steel, SZP mobile pedestals are extremely durable and stable.

- Ball bearings slides provide smooth and simple extension of drawers.
- SZP mobile pedestals are equipped with central locking system which opens and closes all drawers at the same time.
- There are 2 versions of mobile pedestals available:
 - lower ones (520 mm high),
 - higher ones (663 mm high) allowing to use the space under the desk to the maximum extent.
- We offer two types of mobile pedestals: with 2 and 3 drawers.
- Pedestals equipped with 4 swivel wheels, including 2 wheels with brakes.
- They are covered with melamine top. For the choice of colours see page 142.
- Drawers are mounted on full extension ball bearing slides - 40 kg load capacity.
- Size of a drawer: 330 x 420 mm.
- Pedestals with a central lock placed on the right side of a pedestal.

OPTIONAL ACCESSORIES:

- plastic pencil box as an insert,
- fronts of the drawers made of melamine covered board.

OFFICE FURNITURE

HEIGHT ADJUSTABLE DESKS

Workers in offices and other workplaces spend a lot of time at their desks, often sitting in one position, what affects their health and spine. According to specialists and therapists height adjustable desks are the best choice for our health. Ergonomic standards require the angle of 90° between arm and forearm when sitting at the desk. Therefore, a height adjustable desk is an ideal solution.

BENEFITS:

- It allows to adjust the top of the desk to an individual user. A taller person may adjust the height of the desk to their need.
- Switching from the sitting position into standing position and the other way round ensures a body motion, thus well-being improvement and better work effectiveness.

Desks with adjustable height are equipped with intelligent control panel for height adjustment. It offers wireless Bluetooth technology, memory for two positions and a LED reminder.

DESK ADJUSTMENT

To set a desk the panel must be bent up or down. Position of the body can be changed during work even without looking at the device and without diverting attention away from the performed activity.

CONTROL PANEL

TECHNICAL SPECIFICATION

REMINDER

The desk panel has a built-in LED, which reminds about the necessity of switching your body position during work.

There is also a possibility to change the time interval between the reminders. To set your own intervals of time the application Desk Control must be downloaded. Using this application through your smartphone you can e.g. control the desk setting, receive reminders and save chosen top settings. The application enables connection via Bluetooth and it is available for the iOS and Android devices. You can save the two most frequent settings for the tabletop. After the chosen settings are saved the panel bends the desk. Therefore you can change your body position during work easily.

A safe desk load capacity is up to 100 kg. The desk is equipped with lifting pillars and control system ensuring silent and smooth work of actuators, smooth start and stop.

OFFICE FURNITURE

ACCESSORIES

Every office device, if it is not wireless, uses cables. When planning the office interior arrangement, cables must be taken into consideration.

A vertical cable duct hides cables connected to the central unit (keyboard, monitor, printer). It looks like a regular element of the desk and gives it original look. Furthermore, cables do not tangle under your feet or lie unaesthetically under the desk.

Office desks may be equipped with accessories:

- media ports,
- mobile pedestals with an upholstered seat,
- cable ducts,
- cable feedthrough,
- cable management spine,
- tops made of 18 mm melamine covered board.

As well as other equipment - according to the customer's needs.

For the choice of colours see page 142.

TECHNICAL SPECIFICATION

MEDIAPORTS

Media ports enable to connect the necessary media directly to sockets recessed in a table. A lockable cover with brush pass allows for ergonomic use of media port, both in open and closed position. We offer the possibility of any configuration of necessary slots (from 2 to 10 media modules). There is a possibility of installing the following sockets:

- power sockets,
- computer slots.

CABLE FEEDTHROUGH

Cables connected to a mouse, loudspeakers or a laptop are very problematic when sitting at a desk. A solution to this problem is to install special cable feedthrough which get rid of that issue.

CABLE MANAGEMENT SPINE

A vertical cable management spine hides the cables connected to one Central Unit and plugged into the nearest socket (recessed e.g. into the floor). Cable management spine is very aesthetic and it gives original look. In addition, cables do not tangle under your feet.

OFFICE FURNITURE

TABLETOPS

- Tops are made of 18 mm thick melamine.

COLOURS OF TOPS:

- grey
- cream
- white
- black
- Sonoma Oak
- Lancelot Oak

- Sides covered with the colour of the top.

- Sides covered with black veneer - optional (at extra charge).

CABLE DUCT

A horizontal structural beam under the top strengthens the stiffness of the construction and serves as a horizontal channel allowing to hide wires in an aesthetic way. This keeps all cables tidy and makes workplace look exceptionally aesthetic.

- Cable duct is included in standard equipment.

CABLE FEEDTHROUGH

Cables connected to a mouse, loudspeakers or a laptop are very problematic when sitting at a desk. A solution to this problem is to install special cable feedthrough which get rid of that issue.

CABLE MANAGEMENT SPINE

A vertical cable management spine hides the cables connected to one Central Unit and are plugged into the nearest socket (placed e.g. into the floor). Cable management spine is very aesthetical and it gives original look. In addition, cables do not tangle under your feet.

OFFICE FURNITURE

STK COFFEE TABLE SKA1 LOCKERS

Coffee tables are simple and at the same time elegant, functional and practical. They perfectly match Scandinavian and simple styles of interior design. They complement the interior designed in loft style and modernise a classic space.

The form of coffee table makes it ideal for the living room (additional desk) or for the relaxation area. At present coffee tables are used more and more frequently in business areas as a place for business conversations. They also appear more and more often in media (discussion panels, debates).

- A set of coffee tables consists of two tables: one higher coffee table and a lower one which can be hidden under it.
- In order to enable sliding the lower coffee table under the higher one, a bottom bar was removed in each of them. This is also a great visual asset.
- Both coffee tables have tops made of melamine and levelling feet.
- Colours of the tops - according to our standard offer of tops - see page 142.
- We offer three sets of coffee tables:
 - two sets with a square top (60x60 cm & 80x80 cm),
 - one set with a rectangular top(120x60cm).

SKA1 LOCKERS

A small locker/box for storing tiny items. Doors equipped with cylinder lock in 1 point. Cabinets may be fixed together.

SOCIAL FURNITURE

SUS W lockers with compartments

Lockers with compartments, thanks to their functionality, variety and aesthetic values may be used in a wide range of facilities, e.g. in changing rooms, kindergartens, schools, boarding schools, swimming pools, fitness clubs, gyms, railway stations, workplaces - for storing briefcases, handbags, hard hats etc.

■ Welded construction based on closed profiles improves the rigidity of wardrobes.

The main advantage of SUM W, SUS W, SUL W lockers produced on the new line is their advanced construction based on closed profiles, which are implemented into the sides of doors, in the middle of the body and at the bottom of a locker. Lockers are certified, approved and they meet EU safety standards.

ADVANTAGES OF LOCKERS

MEDALIST WARDROBES

LOCKERS WITH COMPARTMENTS WITH SHELVES

Lockers are made of top-quality powder coated steel. We use powder coatings from leading global manufacturers. A wide range of standard colours - 16 RAL colours. Our lockers have declarations and certificates of compliance with both Polish and European norms, as well as hygienic certificate issued by PZH (National Institute of Public Health).

- Lockers may be put:
 - directly on the floor,
 - on socles (from WSU lockers) - total height of a locker on socles is 1940 mm,
 - on bench (from WSU lockers) - total height of a locker on bench is 2190 mm,
 - on legs - total height of a locker on legs is 1940 mm.

- Lockers are equipped with:
 - a bookshelf,
 - 2 hooks for hanging clothes placed on the side of the shelf,
 - a self-adhesive nameplate,
 - a key lock or a lock for a padlock,
 - other locks - on special request.

- There is a possibility of adding a 200 mm high slanted top.

- For accessories available - see pages 190-191.

UV PRINTING

There is a possibility of placing a UV print on the metal locker doors. We can print everything, including a picture submitted by the customer. At present, a UV print is the most up-to-date solution of all digital prints that can be applied to any flat material, including metal, glass or PVC. It is the newest technology allowing to produce the top-quality pictures of high wear resistance. A UV print guarantees an aesthetic look, colour fidelity and a photographic quality of the picture - it all makes it excellent for both interior (it is odourless) and outside (fully resistant to weather conditions).

This technology makes it possible to adapt the furniture to individual needs of every customer. Lockers may be decorated with a print, numbered or marked depending on their destination. A UV print on Malow furniture and then enjoying the view of the locker may lead to greater satisfaction and motivation to work and learn as well as more efficient work organisation.

The sole limit is your imagination. Therefore, it is worth unleashing your creativity and surprise everyone with an original, individual idea.

SOCIAL FURNITURE

POWDER COATING WITH OMBRE EFFECT*

The term OMBRE derives from the French word for 'shadow' and it means a gradual bleaching; like switching from one colour into another.

MALOW offers painting metal doors with an innovative technique called OMBRE. It is a total novelty in the domestic as well as European market! Powder coating with OMBRE effect is registered in the Patent Office as our company's registered industrial design.

It may mix any colours from the RAL palette, creating original and unique combination. Each door is different; it is impossible to recreate two identical combinations. It results in a unique and fabulously colourful locker. The only limit is your imagination.

A few exemplary combinations of colours may be found at the next pages of the catalogue.

* registered industrial design

SOCIAL FURNITURE

LOCKS, POSSIBILITIES

STANDARD LOCKS:

- Cylinder key lock, 1-point or 3-point lock (photo A, B and C).
- Lock for a padlock adapted to hang a padlock, 1-point or 3-point lock (photo A, D and E).

SOCIAL FURNITURE

BENCHES AND SHELVES FOR SHOES

It is often impossible to leave shoes in a locker. Shoes may be too wet, dirty or too large (e.g. boots) to leave them together with clothes. When it is necessary to leave shoes in a changing room an excellent solution is to equip the benches with shoe shelves.

- Shoe shelves enable leaving shoes under the social locker.
- Shelves are perforated and 230 mm deep.
- Adapted for standard, economic and extendable benches.
- All benches are adapted to install a shelf thanks to holes in the front legs. Therefore, it is possible to purchase a shelf later on and fix it to the bench.
- All benches are equipped with holes enabling installation of a shoe shelf.
- They are sold separately, for self-assembly.
- Shoe shelves must be ordered separately.

BASES FOR WSU WARDROBE LOCKERS

Lockers may be put onto benches and then fixed with screws.

Benches are made of wooden slats covered with clear varnish or plastic slats - especially recommended in environments of increased humidity.

We offer two price versions of benches:
 - standard (frame and legs made of closed profile steel),
 - economic (frame is made of angle profile steel, legs of closed profiles).

We offer very practical extendable benches, allowing to save space in a changing room. These benches are a perfect solution for optimal space arrangement. Benches are with an extendable seat which is hidden under the locker.

All benches increase locker's height by 390 mm.

All benches are equipped with openings for installing a shelf for shoes.

Shelves for shoes must be ordered separately.

SOCIAL FURNITURE

WARDROBE LOCKERS WITH MDF DOORS

Wardrobe lockers with MDF board doors combine perfect technical parameters of a metal locker, aesthetics as well as eco-friendliness of an MDF board.

- MDF is a perfect substitute of wood which does not contain any structural imperfections which are common among wooden products such as knots and cracks. Uniform composition and density make it an ideal material. Colourful or woodlike MDF fronts contribute to the extraordinary look of a social locker.

- Doors made of top-quality laminated MDF board.

- Galvanized hinge strips.

- Depending on the type of a social locker, compartments may be equipped with a bar with hooks (MSus 312, 322), meanwhile lockers like Sum have additional higher shelf for storing various items.

WNL+ LAPTOP TROLLEYS

- WNL+ laptop trolleys for safe storage and batteries recharge.
- Trolleys are to be supplied with ~230V. Electrical wiring consists of a removable power strip equipped with n number of sockets with ground and a system for sequential connection of devices.
- To increase safety and reliability, the trolley is equipped with a system maintaining low load of the electrical wiring during switch on.
- In case of failure or damage, overload protection reduces risk of fire and electrocution.
- Doors locked with a 2-point lock. Top of the trolley covered with 18 mm thick melamine board, E-1 hygienic class. Body with ventilation holes for air circulation (cooling of charging devices).
- Wide range of accessories, such as a router, a network switch, D class overvoltage circuit, a separable power cord.

WNL+ LAPTOP TROLLEYS

- Melamine top of the trolley can be used as a workspace.
- Body with ventilation holes for air circulation.
- Maximum size of stored device is 96 x 340 x 470 mm (17").
- Steel body painted with top-quality powder coat.
- Trolleys with declaration of compliance with the LVD 2014/35/EU Directive of the European Parliament regarding safety of use.

MEDALIST TROLLEY

Work safety

Power strip equipped with sockets with grounding, and a system for sequential connection of devices. Trolleys with declaration of compliance with the LVD 2014/35/EU Directive of the European Parliament regarding safety of use.

Mobility

Mobile thanks to 100 mm diameter swivel wheels covered with non-marking rubber (2 of them with brakes).

Ergonomics

Handles mounted on both sides and the top make the trolley easy to use. An inseparable power cord (a separable power cord available as an option). Side mounted cable reel. Resettable overload fuse and illuminated power switch.

Security

Doors locked with a 2-point lock. Bottom edges of trolleys are secured with rubber corner protectors.

Ventilation

Body with ventilation holes for air circulation.

Additional equipment:

- Router
- Network switch
- D class overvoltage circuit
- Separable power cord

SCHOOL FURNITURE E-CLASS

WNT TROLLEYS FOR TABLETS

Tablet trolley with function of battery charging is used to store and transport 32 tablets + 1 laptop. It is ideal for schools, colleges, libraries, conference rooms – anywhere where there is a need for secure storage and simultaneous tablets charging.

- The trolley is equipped with:
 - A socket for charging laptops,
 - inserts made out of incombustible foam allowing to store 32 tablets (maximal size per one tablet is 12x205x295 mm, ~12,2"),
 - numbered compartments,
 - a shelf (100x340x520 mm) with a socket for laptop,
 - handles on both sides,
 - four 100 mm diameter swivel wheels (made out of non-marking rubber) of 150 kg load capacity per wheel, two of them with breaks,
 - side edges of trolley are secured with rubber corners,
 - 2-point lock,
 - a top,
 - ventilation openings for air circulation in the body,
 - a three-metre-long supply cable,
 - a handle on the side for reeling of supply cable.

Advantages of WNT trolley:

- possibility of simultaneous charge of up to 32 devices (tablet, smartphone and additionally one laptop),
- each USB port equipped with LED diode confirming proper functionality,
- double circuit-breaker protection and protection against overload,
- protection against overheating,
- implementation of single loading time limiter (up to 10 hours) to safe the batteries of currently charging devices and to decrease energy consumption.

HANGING CANTEEN LOCKERS

Canteen lockers to store food products and personal items are perfect for such places as canteens or buffets.

- Thanks to specially designed openings it is possible to hang the lockers on the wall and to fix the lockers together to make larger sets.
- Each compartment is equipped with place for name-plate indicating the owner of the compartment.
- 2 keys for each compartment.
- There is a possibility of ordering a 'Master' key which can open every compartment.
- In addition, lockers are equipped with slanted tops that help maintain cleanliness.

SOCIAL FURNITURE

KBS LOCKERS FOR DIRTY AND CLEAN CLOTHING STORAGE

To make work easy, safe and pleasant...

KBS locker is a very practical type of metal furniture both for the distribution of health and safety products and for dirty clothes storage.

- Each compartment is closed with an independent key, and a shared frame allows to open all lockers at the same time. The person distributing health and safety materials has an access to all compartments, therefore it is possible to control the stock and restock them regularly.

- The main advantage of KBS lockers is a significant reduction of industrial safety products, and thus reducing costs.

- Modules of the locker for dirty clothes allow to simply throw dirty clothes through the opening slot.

TECHNICAL SPECIFICATION

MPO METAL RECYCLING BIN

Containers designed for internal use for various types of waste: plastic, paper, glass.

- The body made of 0,8-1,0 mm thick steel, covered with structure powder coating.
- Slanted top prevents waste from piling up on the top of the container.
- Self-closing lids prevent odours.
- Containers allow gathering waste in 120-litre disposal bags or in internal galvanized metal containers of the following dimensions: 700x295x357 mm.
- Easy access to containers is possible due to frontal winged doors locking with a free-turning lock with a possibility of padlock locking.
- Extendable frame for disposal bags placed on full-extension ball bearing slides facilitates the access to disposal bags that are placed on a frame by pressing it down with the upper part of the frame mounted on hinges.

WARDROBES WITH HEATING AND VENTILATION FOR CLOTHES DRYING

LOCKERS WITH HEATING AND VENTILATION

Lockers with heating and ventilation were designed to dry wet clothes, shoes and gloves in closed rooms. They are perfect for humid environmental conditions that affect clothes. These may be: construction sites, uniformed services, waterworks, railways, airports, mines, walk-in freezers, skiing resorts and many other.

- The lockers are made of powder coated steel sheet. They are equipped with connection terminals that enable connecting ventilation duct.

- There are several combinations of available lockers for clothes drying:

- a locker with ventilation and a socket which enables connecting 3 lockers in string,
- a locker with heating and ventilation,
- a locker with internal partitions walls, with heating and ventilation,
- a locker with heating, ventilation, time switch and a socket which enables connecting 3 lockers in string.

- Safety:
 - CE symbol,
 - IP 21 resistance class,
 - thermal protection against overheating.

CABINET FOR CLOTHES AND SHOES DRYING

A cabinet for drying clothes and shoes for 10 sets of work clothing. It is equipped with a bar to hang damp clothes and bottom compartment with 20 pipes for damp shoes. Long pipes enable hanging high working boots. A cabinet with adjustable feet and handles on its sides to move the cabinet easily. A plastic transparent curtain protects from excessive heat loss and enables an easy access to the dried clothes. Cabinet made out of fire galvanized steel sheet. NOTE: The cabinet comes only in an uncoated version.

WORKSHOP FURNITURE

RMM STORAGE RACKS ASSEMBLED BY PRESS FITTING - 500 mm deep

Universal, solid and durable storage racks designed for shops, warehouses, archives and utility rooms.

■ In order to shorten the time-consuming assembly of storage racks we have come up with 'press fitting' assembled storage racks. They are easy to assemble and disassemble.

■ Durability, quality and solidity are their distinct advantages.

■ Elements of the racks are made of powder coated steel.

■ Storage racks made of acid-proof or galvanized steel sheets are available on request.

■ Shelves are adjustable every 30 mm.

■ Maximum load capacity of a shelf:
 - 100 kg
 - 200 kg - Rmm 301 when fixed to the wall or two racks fixed back-to-back.

■ Racks for self-assembly.

TECHNO WORKBENCHES

■ In our range of products you may also find professional workbenches:

- Techno Expert workbenches,
- Techno Light workbenches.

■ Workbenches for self-assembly.

■ Due to the modular construction and two lines, Techno Workbenches offer the possibility to create a workbench in hundreds of combinations according to your needs:

- Techno Expert Workbenches - designed for professional applications,
- Techno Light Workbenches - designed for both professional and amateur applications.

■ WWT workshop trolleys supplement Techno workbenches.

■ We can provide you with a more detailed catalogue of Techno workbenches.

WORKSHOP FURNITURE

WWT WORKSHOP TROLLEYS

- Trolleys are equipped with a special system making it impossible to open more than one drawer at a time.
- Internal dimensions of a drawer: 600 mm x 400 mm.
- Drawers are equipped with ball bearing slides which are extendable in 100% (40kg load capacity).
- Trolleys on 125 mm diameter wheels - 2 of them are swivel with brakes.
- As standard, all trolleys are equipped with tops covered with micro rubber and side edges preventing objects from falling off the trolley. The edges are covered with rubber protection for the increased comfort of usage.
- A side handle may be attached on both sides.
- Perforated backside and side walls allow to hang accessories such as boxes or holders.
- Holders and hooks are available separately.

WORKSHOP FURNITURE

GARAGE CABINETS

A garage cabinet is a free-standing piece of furniture. It is easy to move. It does not require fixing it to the floor or a wall. A garage cabinet is a secure and steady piece of furniture as it is 200 kg heavy and it is of firm construction - on a strong base and additional cross-bracing. A garage cabinet is perfect for parking spaces in the underground car parks. It is a practical and modern solution. It allows to arrange the parking space in an aesthetical, convenient and safe way. Modern apartments and multifamily houses hardly ever have additional basements or depots. A garage cabinet is a solution to such problems. It is a steady, firm and capacious product where you can store objects present in any house but used occasionally or which should not be stored in an apartment, e.g. bicycles, tires, child safety seats, pushchairs, skates, ice skates, helmets and other sports equipment, oils or workshop tools.

Technical specification:

- weight - 200 kg,
- capacity - approximately 5000 litres,
- stable construction,
- cross-bracing,
- load capacity - up to 80 kg per shelf, the whole construction- up to 500 kg,
- steel legs made of profiles,
- a secure lock with 2 keys,
- fire classification of the powder coat,
- a stable base made of 2 mm thick, 50 x 30 mm profiles,
- possibility of anchoring to a floor,
- 2 years of warranty,
- it is delivered on a pallet in two parts: a cabinet + bottom frame for self-assembly. It facilitates the transportation and minimises the cost of transport.

WORKSHOP FURNITURE

CABINETS FOR INDUSTRIAL COMPUTER

A perfect solution for production plants to store industrial computers.

SPNK

The wardrobe has a flat structure of minimum depth. The front screen is adapted to fit a 16:9 LCD screen and of maximum 22 inches diagonal. IP-42 resistance class, confirmed with tests, ensures protection of the cabinet against objects of over 1 mm size, and protection against drops of water falling down on the casing at the angle of 15 degrees. The unscrewed base of the cabinet enables screwing the cabinet directly to the ground. A wide range of equipment as standard: a fan, a power supply, a service wire, and a power strip with the anti-interference filter.

SMK

The upper glass part for LCD screen allows to use the equipment even if there is dust on the production floor. The bottom covered part allows to keep the computer and other devices safe. An extendable shelf allows for using the keyboard easily and conveniently. The cabinet has levelling feet which allow to place it onto any type floor, even the uneven one. The cabinet is equipped with the inner electric fan that cools the working computer. In the bottom part of the cabinet there is a powering anti-interference slat. The back side has ventilation holes in it. The adjustable shelf makes it possible to set its height depending on the type of computer kept in the cabinet.

324

SmKa

Computer protection

Protection against dust and water, accidental damage and unauthorized access – IP 42 resistance class.

Stability

Removable base of the cabinet enables screwing the cabinet directly to ground.

Functionality

The 4:3 front screen is adapted to fit 16:9 LCD screen and of maximum 22 inches diagonal.

Wide range of accessories

2 shelves on latches, 1 extendable shelf for a computer, a fan, a power strip with the anti-interference filter, Ethernet port, power strip, a fixture for LCD screen, doors with a 3-point lock with patent filler, space for a keyboard closed with a 1-point cylinder lock.

MOVABLE SHELVING SYSTEM

LITREG CRANK DRIVEN MOVABLE SHELVING

WE UNDERSTAND THE NEEDS

We understand your need for furnishing offices, archives and libraries. We offer movable shelving. It is a perfect solution for documents archiving and storing, as it provides unlimited possibilities and allows to use the archival area to the maximum.

WE GUARANTEE FUNCTIONALITY

The wide range of equipment and the possibility of setting the individual elements together ensure making the most of even the smallest free space.

Accessories: frame drawers, extendable shelves, supports for documents contributes to work effectiveness and flexibility of setting the movable shelving system.

WE ENSURE THE SATISFACTION

We present our offer on every customer request. We design a plan for developing an archive, a warehouse or an office with bookshelves at no extra charge, providing the most advantageous solutions. Together we will create the optimal solution for efficient use of rooms.

MOVABLE SHELVING SYSTEM

LITREG CRANK DRIVEN MOVABLE SHELVING

TECHNICAL DESCRIPTION OF LITREG 6.3 MOVABLE SHELVING SYSTEMS

1. The trackage construction

The trackage is made of a flat bar (2 x 70 mm) and a flat bar (10 x 20 mm) - galvanized. Both elements are fixed together (welded). The total height of the trackage is 12 mm. Trackage is anchored to the floor with expansion bolts 8 x 60 mm with tapered flange. The outermost tracks have mechanical gate stops preventing the shelving from leaving the track.

Number of tracks:

- for up to 3000 mm long shelving – 2 tracks (2 outermost with anti-tilt system),
- for up to 5000 mm long shelving – 3 tracks (2 outermost with anti-tilt system),
- for up to 7000 mm long shelving – 4 tracks (2 outermost with anti-tilt system).

2. Shelving undercarriage

100 mm high undercarriage (frame) is made of closed steel profiles and bent elements made of powder coated steel sheet. There are shafts in the frame. On the shafts there are cast iron wheels with one-side edge. As standard, all wheels are equipped with ball bearings what improves the quality of use.

In the frame there are distance buffers protecting hands.

3. Construction of the shelving body

Shelving body - front and side walls - are made of powder coated steel. Walls are attached to the frame (undercarriage) with bolts. They are perforated every 25 mm. In addition, for greater stiffness of the construction, a cross-wise strengthening is applied.

MOVABLE SHELVING SYSTEM

WITH LITREG CRANK DRIVE

4. Shelf construction

Shelf is made of powder coated steel. There are two types of shelves: a closed shelf and a shelf with a 22 mm high limiter preventing documents from moving onto the shelf next to it. The shelf is 24 mm thick.

5. Drive mechanism construction

The type of applied drive - mechanical, supported with three-arm crank made of plastic with three rotating knobs. Chain drive is equipped with the drive component and the reduction component. Gearing 1 to 6,8. Shelving moves when a small amount of force is applied. Crank axis with blockade.

6. Decorating panel construction

The front panels (full ones) cover the drive mechanism. 70 mm thick bent cover increases the aesthetic value of the shelving. Panels are equipped with labels for describing the content of segments. The decorating panel is light grey (RAL 7035) but it is possible to paint it any colour from our RAL colours palette.

7. Requirements regarding the floor

The difference in level cannot be larger than 10 mm per 5 meters in perpendicular direction with regard to the movement of shelvings and 5 mm per 4 meters. In case of larger variation it is necessary to even out the floor.

Due to the interference into the floor (anchoring, cutting out channels) construction documentation considering the floor is necessary (section of the floor, plumbing/water installations and others).

In insulating ceilings (foamed polystyrene board, mineral wool etc.) where the trails are fixed wall chases must be made and filled with concrete.

Trails should be perpendicular to the ceiling.

REALISATIONS

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING WITH SOFT TOUCH ELECTRIC DRIVE

MODERN SYSTEM

The movable shelving with SOFT TOUCH system is a truly innovative solution. Moving particular units no longer requires any physical effort. Tap gently in specific spot to gain access to required archives. This is a perfect solution for large and frequently used archives, when user is carrying documents and cannot use hands, especially disabled people. Shelving moves smoothly, what protects files against changing their position when moved.

VARIOUS SOLUTIONS

MEDALIST SHELVING

see how it works

shelving with sliding doors

shelving with shelves

shelving with mesh panel

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING WITH SOFT TOUCH ELECTRIC DRIVE

FUNCTIONS

Movable shelving system provides the possibility of transmission by means of an electric motor and cogwheels coupled with transmission shaft. The control system has the following functions:

- opening,
- blocking,
- resetting,
- failure alarm,
- moving apart, airing,
- user protection, safety.

The trackage is galvanized. The total height of the track is 12 mm. Trackage is anchored to the floor with expansion bolts. The outermost tracks have an anti-tilt system, protecting against overturning. Optimally selected number of rails ensures smooth and easy movement of units. There is also a possibility of installing a chain in the trackway.

FRAME CHASSIS

The frame is made of steel profiles powder coated in RAL 7035 colour. The frame is equipped with shafts and cast iron wheels. The wheels have ball bearing to improve the quality of use. The frames are equipped with rubber distance buffers in order to prevent units from sliding off. Movable shelving provide the possibility of transmission by means of following elements: electric motor, cogwheels coupled with transmission shaft.

LOAD-BEARING WALL

Load-bearing wall is made of powder coated steel, perforated every 25 mm (either in intervals or continuously). Thus shelves can be adjusted at any desired height. For additional rigidity of units, a cross-wise strengthening is applied.

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING WITH SOFT TOUCH ELECTRIC DRIVE

Movable shelving with 'SOFT TOUCH' electric drive combines functions of archiving huge stocks of documentation with the best user experience.

Shelves are made of powder coated steel and are equipped with dividers, which prevents documents from moving onto the neighbouring shelf.

Shelf's loading capacity is 40 kg or 80 kg (as an option). The front load bearing wall, from the side of the control panel, is covered with a decorative panel. There is a place for nametags on the whole width of the panel.

SAFETY

The shelving is designed with a possibility of locking with special keys. The access to particular units might be restricted only to employees possessing a particular key. The shelving also has an in-built 'night positioning' option. All units move to make an equal distance from another so as to provide additional ventilation of stored items. Units are equipped with electric overload protection which reacts to all obstacles while moving. Additionally, the shelving is equipped with a passive safety system. The system forces users to have a look at an opened alley, before it moves to another. All the functions guarantee safety of use.

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING WITH SOFT TOUCH ELECTRIC DRIVE

Movable shelving with modern electric drive. The control panel and the entire mechanism of the electric drive are fine-tuned in every detail, with the greatest safety consciousness and comfort of the user.

Movement of the system is performed through the control panel placed on the front wall of each unit. It is possible to move all units with one control unit. Control panel indicates the direction of movement and opening of an aisle. Opening and closing of a particular unit comes down just to press the button on the control panel. The panel is equipped with the system of signal diodes, informing about the system failure. Additional control program is detecting and signalling the place and the kind of a breakdown.

The units are moved with the control panel.

Wires are hidden in a cable channels placed on the top of each unit - as shoulders between units.

MOVABLE SHELVING SYSTEM

MOVABLE SHELVING WITH SOFT TOUCH ELECTRIC DRIVE

It is possible to adjust the height, the interspace of shelves and to fit solutions to individual needs of users.

Lighting of the space between units. The illumination is controlled electronically and works only above the unit currently used by a personnel. Lighting covers are placed on metal trusses, screwed to the top shelves (the covering). The illumination starts automatically when the aisle is opened and switches off when it is closed, provided software allows user to set the time after which the light switches off.

Mesh panel system for safe storage of paintings.

Pull-out frame drawers facilitate access to documents.

SOFT TOUCH SYSTEM TECHNICAL SPECIFICATION

Height (mm)	2019	2394
Width of a shelf (mm)	1000	750
	or agreed with a customer	
Depth of a shelf (mm)	300	
Shelves per unit	5 or 6 shelves + 1 cover shelf	
Distance between shelves	350 mm or agreed with a customer	
Shelf's adjustment	every 25 mm	
Load capability of a shelf	40 kg	80 kg – (optionally)
Distance buffers	20 mm thick	
Drive	electric	
Additional equipment	<ul style="list-style-type: none"> - shelf's dividers - lightning - pull-out frame drawers - mesh panels 	

MEDALIST SHELVING

MOVABLE SHELVING SYSTEM

OFFICE SHELVING WITH SOFT TOUCH OFFICE ELECTRIC DRIVE

An electric office shelving is a very effective solution which significantly facilitates changing the office arrangement and its modernisation while being a functional suggestion for interior design. Nowadays flexible solutions are leading in space design. Instead of dedicated rooms, we offer mobile office shelving which are of comprehensive applications. Office shelving are not only easier to implement and cheaper than building partition walls but also they can expand and keep up with changing needs and office furniture.

The shelving may be equipped with an office part consisting of shutter cabinets with shelves, compartments and open shelves for binders. The social space is made up of a bar for clothing and a shoe shelf. The last stationary part is an upholstered seat where a worker may rest during break, have a call or have a coffee.

A sliding office shelving with an electric drive complemented with upholstered elements is an innovative suggestion for a comprehensive furnishing of an office room. It is both an excellent idea for having a rest in an office and a helpful facility for every-day office work.

Section 1

Section 2

Section 3

Section 4

SOFT TOUCH OFFICE TECHNICAL SPECIFICATION

Section 1 - movable and closed, equipped with two sets of filing cabinets with shutter doors. Cabinets with cylinder locks. Binders and other office supplies can be stored there. The bottom cabinet is equipped with an adjustable shelf and it can store two rows of binders. The body is made of powder coated steel.

Section 2 - movable, equipped with two sets of clothing compartments. Each section allows you to store clothes on hangers, and additional adjustable shelves allows to store shoes and other parts of clothing. Each compartment is equipped with a shelf with metal bar and an adjustable shelf placed in the bottom part. All parts are made of powder coated steel.

Section 3 - movable, equipped with two lockers and two shelving compartments for boxes of files. Lockers with doors made of metal and MDF board, with cylinder locks. The filing compartment is equipped with three shelves, adjustable every 25 mm. The body and elements of filing compartment are made of powder coated steel.

Section 4 - stationary, equipped with a ~450 mm high upholstered seat. There is additional free space under the seat for storing catalogues, magazines etc.

Height	1500		
Width	1000	1500	2000
Depth	600		800
Exemplary construction	Top is covered with 16 mm thick MDF board with veneered edges, Body of the shelving is made of 0.6 – 0.8 mm thick steel sheet, Doors of lockers are made of 16 mm thick MDF board and 0.8 mm thick steel sheet, locker at 1 point, Front walls are made of 1.0 mm thick steel sheet, Elements of front and back of the shelving are upholstered.		
Exemplary equipment	~725 mm wide cabinets with shutter doors, equipped with metal shelves, ~300 mm and ~400 mm deep metal shelves, mounted on both sides of a section, Hanger for clothes, ~300 mm and ~400 mm deep lockers with MDF or metal doors, mounted on both sides of a section, Shelving compartment for boxes of files, with shelves adjustable every 25 mm, ~450 mm high upholstered seat.		
	Presented shelving design and interior furnishing is exemplary. It is possible to make mobile office shelving based on customer's proposals.		
Drive	Electric drive, power supply placed in a track, sections can move to any distance, drive transmission using a low power electric motor and gears coupled to a drive shaft.		
Power supply	Shelving's installation powered with 230 V AC/16A, all control and drive elements are powered with max. 24V DC voltage.		
Controlling	Touch control panel placed on front wall of each section, operated with buttons indicating movement direction of sections and corridor opening, additional shelving management program to detect and signal location and type of failure.		
Control system functions	- opening, - blocking, - reset, - failure indication, - spreading apart, - ventilation, - employee's protection, - security		
Trackage	Surface, with interference in the floor (anchored) or with filling. Galvanized tracks.		
Safety	System overload detection function, - shelving stop function at a resistance of 30 kg - overload system (electrical), reacting to increase in current in electrical circuit when encountering an obstacle between sections spread apart.		
Other possibilities	Possibility of so called 'night positioning'. Shelving can be programmed to spread apart at a given time to vent stored materials.		

The construction of the shelving and its maintenance guarantee full safety of employees. Individual sections are designed in compliance with the applicable safety standards.
