

# Stainless steel furniture

We would like to offer you furniture made with stainless steel.

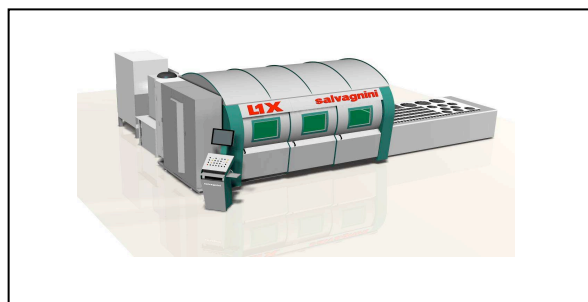

This newsletter presents some of new technical possibilities.

Due to many years of experience and new machinery, we are able to produce almost every order. We can also produce products non-presented in this newsletter – on special demands.

Our stainless steel products are featured by solid and stable construction, high quality and aesthetics. They ensure cleanliness, sterility and durability. The stainless steel furniture can be dedicated for various industries: food industry, medical centers, construction, automotive and many other.

We use the laser cutter - the latest diode-fiber technology. The machining of steel sheet, including stainless steel, is executed by laser cutter **L1Xe-30 FIBER** by SALVAGNINI – leader in diode-fiber laser.

We provide an expert advice.

## Social furniture

Cabinets dedicated to social rooms in food processing plants, restaurants and catering kitchens. It is proper arrangement for social facilities where sterility and cleanliness are required.
