

Furniture you can depend on

METAL FURNITURE

2011/2012

Dear Customers,

We would like to introduce our new catalogue of metal furniture.

What we have started 20 years ago, thanks to the creativeness and initiative of many people has resulted in the creation of a Company offering a very wide assortment of metal furniture. Our products reflect the commitment of the whole Company, which is ready to deliver each product according to the customer's wish, having high quality guaranteed by MALOW brand mark.

The key to our success is comprehensive customer service, high quality of our products, complexity of tenders and its availability through our own distribution network.

Our greatest asset is the confidence our customers put in us, as well as a stable and experienced staff. Our successes are the motor of our activities and encourage us to improve and to fulfill new needs of our customers. Starting from 1989, the range of our metal furniture is a synonym of reliability, creativeness and functionality. Thanks to continuous implementation of the innovative and modern technologies, we can offer you new solutions in the field of office, social, workshop and medical furniture.

Our motto is: "Furniture you can depend on".

Every company is based on people - people who represent our customers, suppliers, our business partners and our workers. We know perfectly well that our success would not be possible without cooperation with our customers. Therefore, we carefully listen to your voice and we hope that we will fulfill your expectations fully.

Chairman of the Supervisory Board
Henryk Owsiejew

The background of the entire page is a blurred, low-angle photograph of a modern office building's exterior, showing glass windows and architectural details. The image is oriented vertically, with the building's facade running from top to bottom.

Filing cabinets with increased fire resistance Szk301og, Cabinets for CD's Scd

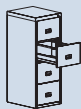

Filing cabinets with increased fire resistance Szk301og

Double sheet steel cabinet. The space between cabinet sheaths is filled with a fireproof material. Fire resistant filling significantly extends the time of fire access to the documents. Fireproof seal protects the cabinets contents against quick warming and against water as an extinguishing agent. The possibility assembly of A4, Folio, Grand Folio formats.

Cabinets for CD's Scd

CD's can be kept in three rows – 22 pieces in each row. CD's supporters inside the drawer are movable. Each drawer can be described thanks to the self-adhesive cardholders placed on the front of the drawer. Drawer's full extension enables easy access to all CD's. Drawers are equipped with a central locking mechanism. Drawers are installed on double extension telescopic ball bearing slides, protected against falling out. Additional equipment (available at extra cost) – top plate (selection of top plates on page 41).

option – various types of locks

option – made of stainless steel sheet

option – made of zinc galvanized steel sheet

for customer's assembly

ventilation or ventilation with heating

Wardrobe lockers Sum 300 mm width

Wardrobe lockers allow for an aesthetic and functional arrangement of social rooms for workers. A wide choice of products guarantees the satisfaction of the most sophisticated requirements.

Ventilation holes in the doors allow for an air exchange between the locker and the room.

We offer lockers in various price versions dependant on the type of steel sheet and its thickness.

Legs and bottom plate are made of galvanized steel sheet – better protection against corrosion.

Lockers' equipment:

- plastic bar with hangers
- shelf over the bar
- mirror
- door hook

Different locks – page 86.

P – benches for wardrobe lockers

- ☑ Single bench makes it possible to connect the lockers in a row.
- ☑ Seat consists of three wooden slats, coated with colourless varnish, or plastic slats especially useful in swimming pools and other wet environments.
- ☑ Possibility to make the frame of galvanised steel sheet - better protection against corrosion.
- ☑ We can also offer extendable benches for Sum lockers being extremely practical and saving space in the locker-room (the bench does not take space in the room as it is slipped under the locker).
- ☑ We can offer one-side and two-sides benches.
- ☑ It is possible to set up two chains of lockers back to back on one bench.
- ☑ The bench frame is made of steel rectangular profile.
- ☑ Bases' feet can be equipped with height adjusters, which allows leveling the cabinet, even in uneven floors' areas.

One-side benches

– frame made of steel rectangular profile

Wardrobe lockers Sul

We have elaborated our locker design by including L-shaped compartments to make more effective use of little floor space.

Lockers are manufactured as single or double units. They can be placed on benches for wardrobe lockers. Ventilation holes in the lockers are placed along the rear walls.

We offer Sul lockers in various price versions dependant on the type of steel sheet and its thickness.

Different lock variations (as required by the customer) allow for universal usage of this kind of locker.

Available locks – 1 point lock.

Kbs lockers

Lockers for storing dirty and clean clothing are particularly practical type of social furniture. The function of opening all the compartments at once thanks to a common frame in the locker makes it possible to have the clothing easily placed in each compartment, for example clean working gloves. Every worker can consequently open his compartment and take out the gloves prepared for him. There is a module of the locker designed for throwing in dirty clothing.

Firemen lockers Sus, social lockers with ventilation or ventilation with heating Sum

Firemen lockers are used for storing clothes which are used by the firemen during their work. The lockers are made of galvanized steel sheet. The top compartment is a locked with a single point blocking cylindrical lock. Beneath the compartment there is a shelf along with a bar and hooks for hanging clothes. On top of the locker there is a helmet holder. The bottom of the locker is perforated, which facilitates water draining and drying of the clothes. The locker can be placed on a bench.

The idea behind the lockers **with ventilation and ventilation with heating** is to effectively exchange the flow of air with the outside, with the additional possibility of drying with the use of a ventilator and a heater. The drying time can take up to 6 hours. The lockers are designed to be used indoors. The locker's body is made of galvanized and powder coated steel sheet. The locker is equipped with a lock and a humidity resistant brass key. The wattage of the locker is 220 W.

Laptop and mobile phone lockers

Laptop lockers and laptop lockers on wheels

combine the function of securing laptops and charging their batteries during storage. A surge protector is installed in the locker, which contains sockets in every compartment to plug in the laptops' batteries.

The laptop storage locker is also available without the electric installation.

Lockers for mobile phone storage

The lockers are perfect for places where it is forbidden to use mobile phones. The lockers provide a safe storage space for places such as reading rooms, libraries, gyms, schools. Each compartment has its own independent lock. Different locks' versions are also available, for example code locks and coin deposit locks.

Storage Racks Rmm

The universal storage racks are necessary in those places where different goods, tools, cardboard boxes, and other items are kept. We have designed racks assembled without screws to shorten the assembly time. They are very easy and simple to assemble and disassemble.

Durability, solidity and quality are the real advantages of these racks. The rack elements are made from powder coated steel sheet. The shelves are adjustable in 60 mm increments in the racks assembled with screws and in 30 mm increments in racks assembled without screws.

Acceptable load capacity of the shelf is 100 kg. They are delivered in elements for self assembly.

Industrial computer Cabinet SmK

The ideal solution for Industrial PCs in the warehouse facilities. The top glazed part of the cabinet for the monitor allows the use of the equipment even in conditions where dust and dirt are present in the air.

The sealed bottom part is used for keeping the CPU and other associated equipment safe.

An extendable shelf makes using the keyboard safe and comfortable.

The cabinet has adjustable feet, which allows leveling the cabinet on uneven floors. The cabinet is equipped with an internal electrical fan that cools an operating monitor.

A strip suppression is mounted at the bottom of the cabinet.

The rear wall has ventilation holes. The adjustable shelf makes it possible to set the clearance inside depending on the kind of computer being kept in the cabinet.

SmK 4a – industrial computer cabinet with LCD monitor.

Laboratory Furniture Szl

You can find in our wide range of products some laboratory furniture that are custom made. We present only one of possibilities.

Laboratory set includes 2 cabinets covered with one common counter. One cabinet is equipped with a adjustable shelf and the other with 5 drawers. Cabinets are covered with a counter made of epoxy resin, resistant to high temperatures, acids and other compounds used in laboratories. The counter has a hardness level comparable to stone but is neither porous nor permeable. Thanks to this feature, chemical compounds, pigments or other liquids used in laboratories do not penetrate the surface of the countertop. Counter are resistant to high and low temperatures that occur during typical laboratory conditions. Counters are made from a monolith material

which keeps an ideal closed structure throughout its entire thickness. A smooth surface without any joint ensures easy cleaning and maintaining the cleanliness. Countertops are available in 3 colours: grey, black and white. Standard melamine countertop is also available. The furniture are powder coated in epoxy with resistance to chemicals what's ideal for use in laboratories. The Szl 303 movable container is equipped with maneuverable antistatic wheels that do not leave the scuff marks on the floor. Two of the wheels are equipped with brakes. Cabinet's dimensions are adapted to the dimensions of the set so that the cabinet can stored under counter. The cabinet is equipped with its own tabletop made from epoxy resins (melamine optional).

Safes

Double plate safes for storing valuables compliant with the European Union norms - PN-EN 1143-1. We produce safes in classes 0, I and II. We offer office, furniture and wall safes. The bottom of the safe is equipped with a special hole, which allows the safe to be fixed to the floor.

Additionally, the safe's body can be equipped with a fixing at the back.

Safes are certified by the Institution of Precision Mechanics – classes 0, I and II. A number of locks are available (key lock, combination lock: mechanical, electronic).

The safe's construction ensures optimal protection against:

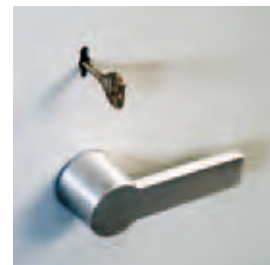

- breaking in with mechanical tools,
- breaking in with thermal tools,
- levering the doors.

OFFICE SAFES CLASS 0 – LSP

- ☑ Certified devices for securing valuables compliant with PN-EN 1143-1:2006 norm.
- ☑ 8 mm thick door with a steel deadbolt system.
- ☑ The shelves are vertically adjustable.
- ☑ Key lock with two keys (IMP class A certificate) as a standard.
- ☑ External hinges.
- ☑ Lock secured against drilling.
- ☑ Higher thermal resistance.
- ☑ Safe equipped with holes and montage screws.

Archive with LITREG

When it comes to equipping of offices, archives and libraries, you can always count on Malow Company. Our mobile shelving system LITREG is a perfect solution for archive and storage purposes, giving you limitless possibilities and allowing you to fully utilize storage space.

Satisfaction guaranteed

We answer every inquiry and plan the furnishings of archives, warehouses and offices free of charge. We offer the optimal solution in terms of functionality and efficiency, creating a modern, versatile design.

Functionality

A wide range of possibilities when it comes to furnishings and combining particular elements ensures effective utilization of even the smallest storage space. Application of crank mechanisms facilitates easy movement of the racks.

The additional available equipment, such as frame drawers, extendable shelves and document brackets all contribute to the effectiveness and flexibility of the mobile shelving's use.

We offer you solutions which adapt to your needs and ensure functionality, dynamics and efficiency of use and at the same time provide a user friendly atmosphere.

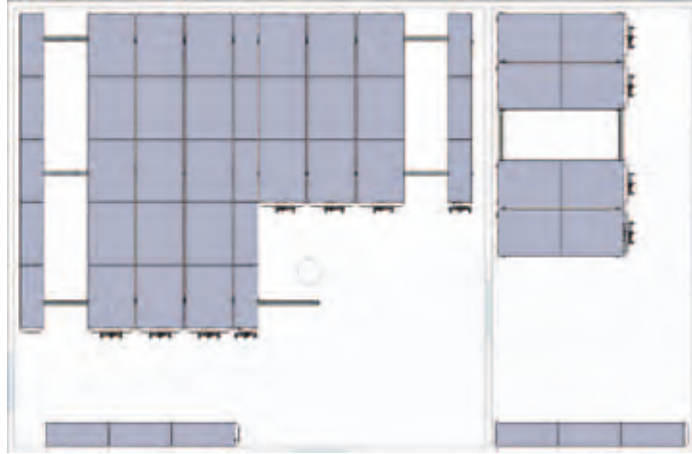

Take a look at some of the solutions that make our mobile shelving system unique:

Extendable frames drawers (1), shelves (2) and document supports (3) contribute to the functionality and wide utilization of the mobile shelving. The crank system (4 & 5), which is equipped with a blockade and can be additionally equipped with a locking mechanism provides a high level of security, at the same time being very convenient in use. The solid carrying frame (6) and cross-wise strengthening (turnbuckles) (9) ensure the unit's stability and durability. The adjustable shelves (8) fixed by the use of hinges and card holders (10) maximize the shelving's flexibility and proper organization of documents. The track-way is embedded in the floor (11) and is equipped with a distance buffer (12) to ensure safety.

Exemplary furnishing with mobile shelving

Exemplary furnishing with mobile shelving in 3D

Stationery racks allow archiving only 1040 file folders

ECONOMY OF SPACE

With the use of LITREG mobile shelving, you can double the storage space without the need of arranging a bigger storage area

Mobile shelving system allows archiving 2040 file folders with the same amount of available space

LITREG

Taking the individual technical conditions and the client's requirements into consideration, we make the furnishing plan along with the cost estimate after we receive information about the surface intended to be furnished and other requirements.

A photograph of a mobile shelving system in a room. The system consists of several grey metal cabinets on wheels. One cabinet is open, revealing multiple shelves filled with colorful binders (green, blue, purple, red, black). Each cabinet has a yellow horizontal stripe and a black handle with a red indicator light. The floor is light-colored tile, and the ceiling has recessed lighting.

**ELECTRIC
DRIVE
MOBILE
SHELVING
SYSTEM
SOFT TOUCH**

Modern archival system

The mobile shelving system Soft Touch is a truly innovative solution. Operating the shelving is effortless – it automatically slides to give access to the necessary files with a simple touch of a button. This is a perfect solution for big and often used archives, for example when the user has both of their hands busy with files. It is also suitable for use by persons with disabilities. Thanks to the smooth movement of the units, the files stay in place at all times.

Frame chassis

The frame is made of powder coated steel profiles coloured in RAL 7035. The frame is equipped with shafts and cast iron wheels. The wheels have ball bearings to additionally improve the quality of use. The frames are also equipped with rubber 'distance buffers' in order to prevent the units from sliding off.

Functionality

The units are operated by an electric motor and gears coupled with the drive shaft. The operating system is equipped with multiple functions:

- opening,
- blocking,
- resetting,
- fault alarm,
- moving apart/ventilation,
- user protection/safety.

Load-bearing wall

The load-bearing wall is made of powder coated steel sheet and perforated at 25 mm intervals positioned along the whole height of the wall (either at intervals or continuously). Thanks to this, the shelves can be freely adjusted on hinges, without the use of tools. For additional rigidity of the units, a cross-wise strengthening (turnbuckles) is applied. The front wall is covered with a decorative panel, which is equipped with a card holder for file description..

Track way

The rails in the track way are galvanized. The total height of the track is 12 mm. The tracks are anchored to the floor with the use of expansion bolts. The utmost tracks have an anti-tilt system, protecting the units from overturning. The optimally selected number of rails ensures smooth and easy movement of the units and safety of the process. There is also a possibility of installing a chain in the track way.

Shelf construction

The shelves are made of powder coated steel sheet and equipped with a 37 mm stop preventing the documents from moving to the parallel shelf. The loading capacity per shelf is 40 kg or 80 kg (optional). Shelf thickness is 22 mm.

Safety

The shelving is designed with a possibility of locking with the use of special keys, without which it is impossible to switch on the drive and move the units. The access between some alleys may be limited to employees in possession of a specific key. The shelving also has a built-in "night positioning" option – all the units slide in equal distance between each other in order to provide additional ventilation for the stored files. The units are equipped with an electric overload system, which reacts to obstacles during movement and stops to ensure safety of the users. Additionally, the shelving is equipped with a passive safety system, which forces the user to look in the opened alley before they can move to the next one. All of the above mentioned functions of our mobile shelving system guarantee full safety of usage.

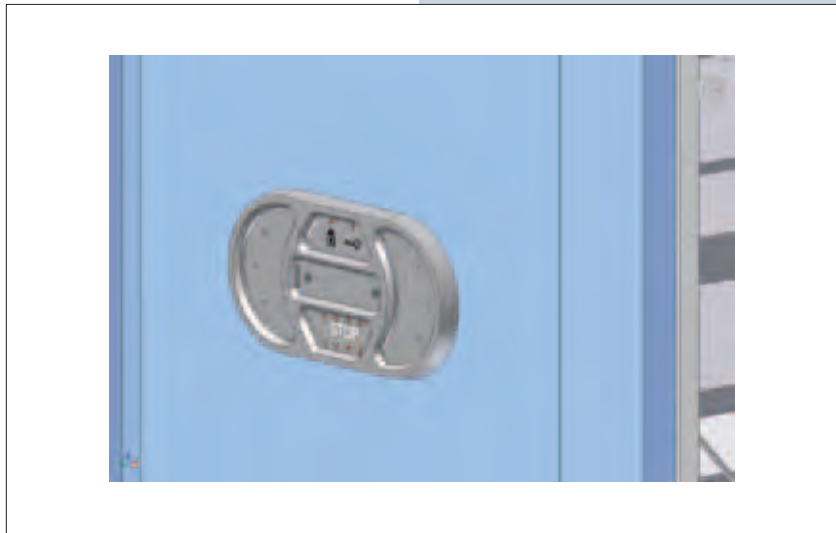

Control panel

The movement of the system is controlled with the use of a control panel placed on the front wall of each unit. It is also possible to control all the units at once with the use of a PC.

The control panel is easy to use – the buttons indicate the direction of the movement of the units and opening of the alley. The opening and closing of each unit is carried out by a single touch of a button on the control panel. The panel is equipped with a LED system signaling a failure in the control system. Additionally, the software operating the movement of the shelving detects and signals the place and type of failure.

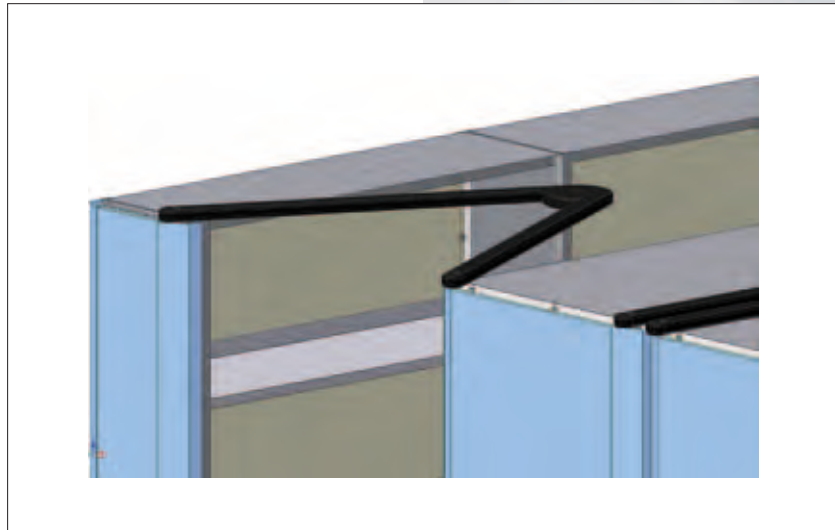

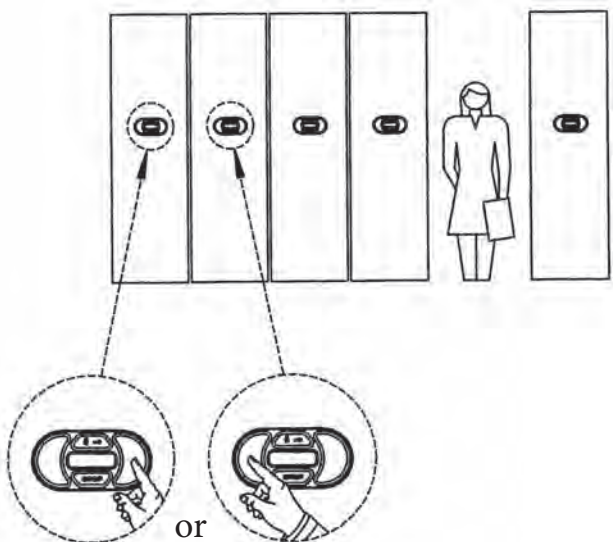

The movement of the shelving is controlled through the control panel

ELECTRIC DRIVE

The use of Soft Touch shelving system provides you with the possibility of a substantial increase in the storage area, a great comfort of use and unparalleled ease of use..

Electrical wires are placed in the cable conduits on the top of a shelf as arms between the segments

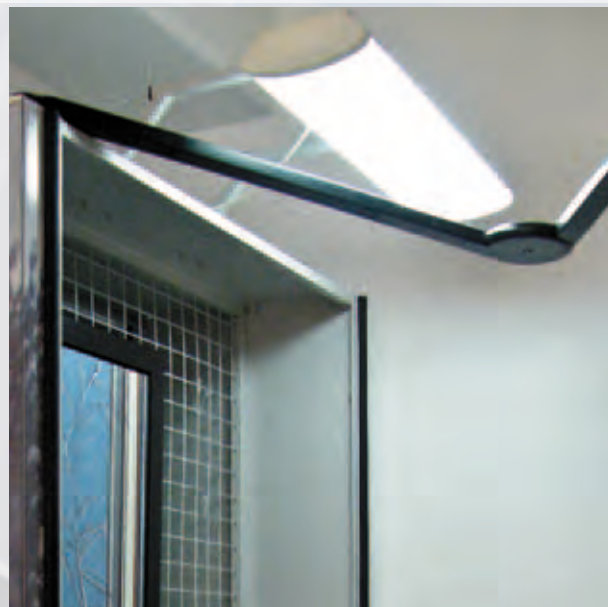

SOFT TOUCH

Additional equipment

The shelving can be additionally equipped with:

- Lightning of the space between segments. Lightning is controlled electronically and is only switched on in the alley currently opened. The lightning frames are fixed on metal brackets and screwed to the covering shelves. The lightning switches on automatically after opening the alley and off after closing. The provided software (controlled with the use of a PC) also allows the user to set the time after which the light is switched off.
- Mesh panel system for safe storage of images.
- Pull-out drawers framework facilitating access to documents.
